Press Release

Shui On Receives Considerate Contractors Site Awards and Outstanding Environmental Management & Performance Grand Awards for Its Excellence in Safety and Environmental Performance

Hong Kong, June 3, 2008 – Shui On Building Contractors Limited (SOBC) and Shui On Construction Company Limited (SOC) collected nine awards in The Considerate Contractors Site Award Scheme 2007 organised by the Works Branch of the Development Bureau, for its outstanding performance in safety, health and environmental management.

The Considerate Contractors Site Award Scheme, launched by the Hong Kong SAR Government in 1995, recognises and commends contractors who have taken a considerate and proactive attitude towards a high level of safety and environmental performance in their construction sites. The award scheme received a record high of 139 entries in 2007. Among them, Shui On's sites received the Gold, Silver, Bronze and Merit awards for both Considerate Contractors Site and Outstanding Environmental Management & Performance, in addition to the Special Award for the Best Performing Minor / Maintenance Works Contract. Once again, Shui On's efforts and contribution to the construction industry were highly recognised.

“SOBC and SOC were much honoured with the awards and the key lies in the team spirit and strong belief in the importance of safety and health, community involvement and environmental management, rooted from the corporate values of being a responsible corporate citizen,” said Mr. Stephen Lee, Executive Director of SOBC and SOC.

For instance, the Eastern Harbour Crossing Site Phase 4 spearheaded the recycling of rock fill for backfilling and making of gabion wall in a bid to reduce the loading of public fill. The project team lived up to the environmental sustainability of the Housing Department, as exemplified by the construction of the Lei Yue Mun Road Recycle Park, and proposed to use waste materials like tyres, glass bottles, pebbles and oyster shells on the basis of the architectural design. Meanwhile, the team also promoted environmental protection in the community in support of the Government's Action Blue Sky Campaign. As a case in point, they joined forces with the Housing Department to launch a green cladding scheme and promoted it among schools in the district, with a view to build a green community, and to strengthen the sense of belonging to the community.

Shui On commanded more industry recognition for its sound safety, health and environmental management system, as well as its innovative ideas and design. Related awards received by Eastern Harbour Crossing Site Phase 4 earlier include: Certificate of Merit for Environmental Performance in 2007 Hong Kong Awards for Industries; Silver Award for Building Sites (Public Sector) in the Construction Industry Safety Award Scheme of the Labour Department; and Outstanding Contractors Award (Building –

Community Participation) in the New Works Category of the Quality Public Housing Construction & Maintenance Awards 2007 organised by the Hong Kong Housing Authority. SOBC was also presented in the same event with Gold Award for Outstanding Contractor in the category of District Term Contract under Maintenance Services Projects, and Silver Award for Outstanding Contractor in the category of Building under New Works.
